

## **Cello Aviation, VIP Charter Flights for Corporate Travel Needs**

It's business travel, but not as we know it. The image of business travel is often the movement of individual employees between sites or senior management visiting potential customers or corporate partners. That is only part of the story. Cello Aviation is *the* solution for companies that have group travel needs. If your business is looking to transport its personnel anywhere in Europe, you may be surprised to know that chartering a Cello Aviation aircraft can be far cheaper than booking individual tickets.

Corporate travel is not always about getting a member of staff from A-to-B for an important meeting. Many companies require a cost-effective solution for getting a number of staff to a location for a common need. This could be a corporate away-day, a large exhibition, corporate conferences or new product launches. In addition to corporate travel, Cello Aviation offer an exclusive service to

- Blue Chip Companies
- Sports Teams
- Motor Racing Teams
- Horse Racing Clients
- High Profile Personalities
- Entertainment Performers
- Wedding Parties
- Conference & Incentive Groups

Cello Aviation can offer your business, exclusive use of their AvroJet aircraft. This is the same aircraft type that is in regular use with many of the leading scheduled services carriers. Cello Aviation's aircraft has been redesigned internally to create 46 luxurious seats instead of its normal 100; offering you the utmost space and comfort for your journey. It is a highly impressive, quiet, modern aircraft which can operate almost anywhere - even in the most environmentally sensitive airports and those with short runways and demanding approaches such as London's City Airport. It has a low noise level and a lower carbon footprint than other aircraft.

The airline is centrally based at Birmingham International Airport which is renowned for its excellent transport routes and it is able to take off from any airport in Europe and take you to almost any European destination non-stop. The aircraft can be chartered on any date or time and can be taken with between 1-46 passengers to the destination that most suits your needs.

Chartering a Cello Aviation AvroJet for the sole use of your company can deliver a very cost-effective solution. Not only, can it be cheaper than paying for 46 individual seats but, the performance of this aircraft enables it to deliver customers to airports not always served by the normal scheduled services carriers – closer to their ultimate destination thereby reducing ground transfer times.

Premium quality, bespoke catering is provided at an on-board level specified to suit your exact requirements and budget. Cello's highly trained and friendly cabin crew will be on hand to make sure your journey is as relaxing as possible. You don't need to waste time with long check-ins and transfers at the airport, Cello will arrange for VIP movement throughout, leaving you more time to enjoy the on board experience.

To get a quotation for your next corporate travel requirements please contact Cello Aviation by calling the sales team on 0121 507 8700 or email [chamber@flycello.com](mailto:chamber@flycello.com)
