CORPORATE MANSLAUGHTER

Advice to help protect your company from the threat of corporate manslaughter legislation

In the wake of the UK's first corporate manslaughter conviction—the reality of the punishment facing business owners who fail to meet their duty of care has never been clearer. Vehicles being driven on company business whether they are privately or company run pose a major risk to all business owners and officers. Add to that new MID legislation becoming enforceable in April 2011 (NOW !!!) and the chances of being caught out are getting increasingly higher. More red tape and monitoring of risk usually means unwelcome increased costs and time spent in form filling.

There is however a fairly simple solution.

Autoplan has a "Safe Driver" system which is inexpensive and takes very little time to implement and run. We have been testing our interactive safe driver scheme which will be available next month to our customers.

How much difference can it make?

Well not only can it save lives. Cotswold Geotechnical Holdings became the first company to be convicted of the new offence of corporate manslaughter in February. The company was fined £385,000.

As part of Autoplan's service, they are offering a **FREE** MID check for all fleets Call us now on 01675 44 33 34.. They can make all the difference and help you avoid the risk of corporate manslaughter.
